SOLAR STREET LIGHTS

Solar Street Lights (SSL-01)

- Solar Panel** ** Power : 60W (More than 16% of the photoelectric conversion rate)
** Property : Imports of Monocrystalline, More than 20 years of life
- Battery** ** Capacity : DC12V/65Ah
** Property : Fully-sealed and maintenance-free lead-acidbattery, Depth of discharge:80%
- Controller** ** Property : DC12V/10A Controller specially designed for solar street lamps
** Function : Protection against overcharge and over-discharge, light control and time controll
- Light source** ** Power: 20w Super bright LED (or halogen lamps, electrode less lamp, high-efficiency energy-saving lamps)
** Average illuminance : 15LUX~18LUX
** Color temperature : 4500~6000K
- Lamp post** ** Height : 6~8m Thickness:3mm
** property:steel overstriking and thickening and thickening, hot galvanization spraying-plastic
- Remark** ** Working time : Fully charged lamps may work 6~10 hours a day (adjustable) and last 3~5 days on-end in cloudy or rainy weather.
** Applicable temperature: -40°C~50°C
** Wind-proof capacity: ≥150FM/H

SOLAR STREET LIGHTS

Solar Street Lights (SSL-02)

- Solar Panel** ** Power : 80W (More than 16% of the photoelectric conversion rate)
** Property : Imports of Monocrystalline, More than 20 years of life
- Battery** ** Capacity : DC12V/80Ah
** Property : Fully-sealed and maintenance-free lead-acidbattery, Depth of discharge:80%
- Controller** ** Property : DC12V/10A Controller specially designed for solar street lamps
** Function : Protection against overcharge and over-discharge, light control and time controll
- Light source** ** Power: 25w Super bright LED (or halogen lamps, electrode less lamp, high-efficiency energy-saving lamps)
** Average illuminance : 15LUX~18LUX
** Color temperature : 4500~6000K
- Lamp post** ** Height : 6~8m Thickness:3mm
** property: steel overstriking and thickening and thickening, hot galvanization spraying-plastic
- Remark** ** Working time : Fully charged lamps may work 6~10 hours a day (adjustable) and last 3~5 days on-end in cloudy or rainy weather.
** Applicable temperature: -40°C~50°C
** Wind-proof capacity: ≥150FM/H

SOLAR STREET LIGHTS

Solar Street Lights (SSL-08)

- Solar Panel** ** Power : 120W (More than 16% of the photoelectric conversion rate)
** Property : Imports of Monocrystalline, More than 20 years of life
- Battery** ** Capacity : DC12V/120Ah
** Property : Fully-sealed and maintenance-free lead-acid battery, Depth of discharge:80%
- Controller** ** Property : DC12V/10A Controller specially designed for solar street lamps
** Function : Protection against overcharge and over-discharge, light control and time controll
- Light source** ** Power: 20w * 2 Super bright LED (or halogen lamps, electrode less lamp, high-efficiency energy-saving lamps)
** Average illuminance : 15LUX~18LUX
** Color temperature : 4500~6000K
- Lamp post** ** Height : 8~10m Thickness:3.5mm~4mm
** property: steel overstriking and thickening and thickening, hot galvanization spraying-plastic
- Remark** ** Working time : Fully charged lamps may work 6~10 hours a day (adjustable) and last 3~5 days on-end in cloudy or rainy weather.
** Applicable temperature: -40°C~50°C
** Wind-proof capacity: ≥150FM/H

SOLAR STREET LIGHTS

Solar Street Lights (SSL-14)

- Solar Panel** ** Power : 220W (More than 16% of the photoelectric conversion rate)
** Property : Imports of Monocrystalline, More than 20 years of life
- Battery** ** Capacity : DC12V/200Ah
** Property : Fully-sealed and maintenance-free lead-acidbattery, Depth of discharge:80%
- Controller** ** Property : DC12V/15A Controller specially designed for solar street lamps
** Function : Protection against overcharge and over-discharge, light control and time controll
- Light source** ** Power: 35w * 2 Super bright LED (or halogen lamps, electrode less lamp, high-efficiency energy-saving lamps)
** Average illuminance : 18LUX~LUX
** Color temperature : 4500~6000K
- Lamp post** ** Height : 9~11m Thickness:3.5mm~4mm
** property: steel overstriking and thickening and thickening, hot galvanization spraying-plastic
- Remark** ** Working time : Fully charged lamps may work 6~10 hours a day (adjustable) and last 3~5 days on-end in cloudy or rainy weather.
** Applicable temperature: -40°C ~50°C
** Wind-proof capacity: ≥150FM/H
